SelectSIPs EXPO

A Better Way to Build

January 27 – 29th / SAN JUAN, PUERTO RICO

The SelectSIPs EXPO is the only annual trade event dedicated 100% to the Structural Insulated Panel building envelope. The 2025 EXPO gives your company a great opportunity to share products, gain visibility, and establish long-term working relationships within the leading-edge SIP industry.

PROGRAM

Networking. Informal, productive business discussion is by far the #1 reason why people attend this annual event. For 2025, EXPO sponsor booths occupy the wall space within the primary meeting room. During each day's multiple refreshment breaks, your prospects will be there in front of your exhibit, ready for relaxed conversation. Golf, social hours and impromptu meal seating provide additional opportunity for feedback on your products and services.

Event attendees invariably request more networking time. The evening after Monday's Welcome Reception is left open for private dinners between meeting sponsors and SIP manufacturers. All EXPO sponsors will receive names and contact information for the 2025 meeting attendees.

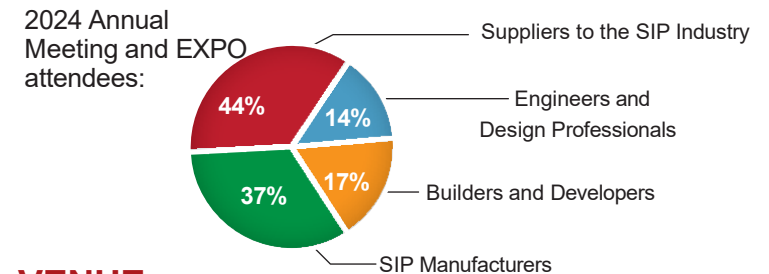

Speaker Presentations. Day Two plenary themes cluster around the updated builder and designer value proposition using the refreshed SIP True Cost Bid Tool, SIPA's near-term strategy refinements, sustainability/life-cycle/carbon messaging with the SIP Industry's first ever Environmental Product Declaration and the SIP Engineering Design Guide. Other topics include market updates on tax credits, new stricter building code adoption, latest SIPA digital and advertising/marketing efforts, and technical research initiatives.

Work Sessions. Day Three features open working sessions for the SIP industry's Manufacturing, Technical and Marketing Committees. Roll up your sleeves and help SIP manufacturers and suppliers evaluate recent technical research, set building code priorities, and share SIP messaging with target audiences such as professional engineers, architects and production builders. (Platinum and Gold EXPO sponsors highlight their products in 10-minute presentations to the SIP Manufacturer Committee.)

Golf. The annual tournament typically attracts about two dozen golfers vying for prizes and laughs. This year, SIP industry golfers tackle the magnificent Rio Mar Country Club at the Wyndham Hotel overlooking the Mameyes River and the mountains of El Yunque National Tropical Rain-Forest. This sprawling 18-hole PGA course offers stunning views.

ATTENDEES

This annual event is usually attended by manufacturers accounting for more than 80% of North American SIP production. Last year's group included more than a dozen General Managers and Owners of SIP production facilities with another half dozen participants holding leadership positions on national standards boards and building associations. Join the 100+ anticipated attendees to share your company's offerings with the decision-makers for the SIP industry.

VENUE

The Structural Insulated Panel industry will convene the radiant city of San Juan, January 27 – 29, 2025. The Royal Sonesta Hotel San Juan, gracefully positioned on the serene Isla Verde Beach, offers an exquisite blend of refined luxury and impeccable service, complemented by sweeping ocean vistas with nearby attractions such as the forts of colonial old-town San Juan and El Yunque National Park, and the Museum of Contemporary Art. The hotel next door, is the big, famous, old world Fairmont El San Juan hotel with a very upscale casino and numerous restaurants & bars. All around the hotel are little restaurants and shops.
