Houses That Work is geared towards educating building professionals on building science principles and practices to cost-effectively solve key construction problems that most affect building performance.

WHO SHOULD ATTEND:

Our professional development course delivers practical and applicable information ideal for **builders, trade contractors, realtors, designers, architects, engineers, code officials, new home salespeople, manufacturing representatives, sustainability students, and anyone working for a home energy rating firm.**

YOU WILL LEARN:

- Building Science Principles
- Wall & Roof Structures
- Window & Door Systems
- Protecting Building Systems
- Foundations
- Mechanical Systems
- Indoor Air Quality
- Marketing for Performance
- Local/Climate-Specific Best Practices
- Program & Code Compliance

Each Session Includes:

- Continuing education credits - CEUs
- Lunch & refreshments
- Handouts & resources
- Mini-Expo provided by national education partners and sponsors
